

UNITE IDEA STARTERS

Furnishing Knowledge®

UNITE IDEA STARTERS

Create an ideal environment with Unite® These idea cards will help you get started!

Each card showcases a Unite layout on the front. The color coding on the front side provides planning direction.

 = traditional planning

 = benching applications

 = storage-based planning

 = wall integration

 = loose furniture integration

On the reverse side of each card, you will find floorplan models and a rough footprint of each configuration, as well as relative cost per user and level of privacy. Many cards also offer a QR code that can be scanned with your smartphone for additional details.

Most of these thought starters feature standard Unite solutions, which can be easily specified and ordered. Others show tailored solutions (noted with **T**) that have been customized to meet specific project requirements. However, the reverse side of these cards shows a comparable floor plan with standard solutions. Whether you're looking to design a simple space or create something truly unique, your KI sales consultant is ready to help you take the next step. Call today or visit ki.com to learn more.
