

INTRODUCTION

The Parker lounge chair is a striking combination of modern design, exceptional comfort, and functional versatility, with its swivel function serving as the centrepiece of its design. Designed by the renowned duo Busk and Hertzog for Worklyffe, the Parker chair offers effortless mobility and flexibility. Its smooth revolving base allows for easy 360-degree rotation, making it the ideal seating solution for spaces that demand adaptability, such as lounges, offices, and waiting areas.

1. Customizable poufs with unique designs that perfectly complement your space, reflecting your individuality and taste.

2. Our poufs prioritize comfort, ergonomics, and sustainability, using environmentally friendly materials for a conscientious furniture choice.

DESIGNER

CATE & NELSON, Their inspiration is drawn from an ongoing design dialogue, and through observation of daily situations and needs that arise from furniture requirements and space we utilise. Cate & Nelson want their furniture to offer something over and above expectations with a touch of humour. Respectfully, with humility and a glint in their eye, they follow the entire design process. They take great joy in being a part of the journey from the first idea to the final product going on the market and finding a home.

DESIGN & STYLE

Metal understructure sofas are available in a range of styles, from minimalist and industrial to sleek and modern. The metal frame allows for creative design elements such as exposed metal parts, intricate metalwork, and clean lines, which can complement various interior aesthetics.

COMFORT & FUNCTIONALITY

Despite the rigid nature of metal, these sofas do not compromise on comfort. High-quality cushions and upholstery fabric are used to ensure a comfortable seating experience. The metal frame supports these elements, maintaining their shape and resilience over time.

1. Our poufs feature double-stitched seams for superior strength and durability, ensuring the longevity of the product.

2.Reinforced Corners: We pay special attention to reinforcing the corners of our poufs, using additional stitching to maintain their shape and structural integrity over time.

DURABILITY & MAINTENANCE

One of the key advantages of a metal and wooden understructure sofa is its durability. Metal frames are resistant to warping, cracking, and pests, making them a long-lasting option. Maintenance is generally straightforward, as metal components can be easily cleaned and are less susceptible to damage compared to wood.
